EDUCATION

Northeastern University

Candidate for Bachelor of Science in Cybersecurity and Criminal Justice, GPA: 3.5

Boston, MA
Aug. 2023 – May 2027

Relevant Courses: Computer Systems, System and Network Security, Network Fundamentals, Algorithm & Data Structures.

Organizations: Northeastern Black Student Association, Ethiopian and Eritrean Student Association, Women in Cybersecurity, AI and Data Ethics, Management Leaders of Tomorrow (MLT).

TECHNICAL SKILLS

Technological Skills: STRIDE, Security Architecture, OSI Model, Risk Management, Machine Learning, TLS/SSL, TCP/IP, Java, SCCM, Active Directory, CyberArk, Intune, Python.

Developer Tools: *Proficient:* Git, Visual Studio, Eclipse, IntelliJ, macOS, and Wireshark; *Familiar:* Microsoft Office Suite, Linux, and Windows

EXPERIENCE

Bloomberg Employee Tech Support Intern

Bloomberg

June 2026 – August 2026
New York City, NY

- Provided outstanding technical support to 26,000+ Bloomberg employees both remotely and in the office. Troubleshoot hardware, software, and network issues across a large-scale corporate environment supporting 28,000+ devices and 120,000+ network connections.
- Ramped up within two weeks to independently handle live support tickets alongside full-time staff, resolving day-to-day technology issues for employees. Utilizing tools such as CyberArk, Bombgar, Intune, SCCM, and Active Directory.
- Partnered with a 7-person intern team to analyze internal data using Excel and internal ChatGPT-based tools, identifying data gap workflow and proposing process improvements; presented findings to senior executives and full-time staff.

Research Assistant

Impact Engine

March 2026 – July 2026
Boston, MA

- Evaluated the fairness, accuracy, and integrity of an existing ML system that extracts data from multiple Massachusetts -area police databases to analyze the cradle-to-prison pipeline.
- Assessing with data quality, bias, and consistency across law enforcement data sources, identifying gaps and inconsistencies that could undermine the reliability of downstream policy analysis.
- Producing structured data integrity reports, translating technical audit findings into actionable insights for policy writers, enabling the development of more evidence-based and equitable criminal justice reform policies.

IT/Audio Services Co-op

Northeastern University CAMD

August 2025 – December 2025
Boston, MA

- Managed 100+ technical support tickets through ServiceNow, implementing process improvements that reduced average resolution time by 10%.
- Resolved technical issues across 50 Linux, Windows, and macOS devices by applying security architecture principles and network troubleshooting techniques.
- Troubleshoot printer network connectivity and internet-related issues across 3 campus locations, achieving 15% uptime improvement.

PROJECTS

Ethical Hacking

January - May 2025

- Performed comprehensive risk assessments through penetration testing and vulnerability scans on 10 simulated networks, identifying and prioritizing 10 critical risks based on potential business impact and likelihood.
- Evaluated secure coding practices and web vulnerabilities and designed attack/defense scenarios in combination of over 5 CTF challenges and documented 10 remediation strategies for common vulnerabilities such XSS Scripting, buffer overflow, and memory corruption.
- Produced technical and risk documentation summarizing findings, mitigation effectiveness, and residual risk, supporting informed decision-making for system security improvements.

LEADERSHIP

Senior Mentor

Legacy Mentorship Program at Northeastern University

September 2024 – Present
Boston, MA

- Orchestrated over 15 mentor-mentee pairings, leading to at least 30% increase in mentees' GPA and over 10 career-related achievements among participants.
- Organized over 10 networking events and over 10 community-building workshops, attracting at least 50 total attendees and resulting in a 20% increase in program engagement.
- Developed 5 training resources for new mentors, improving onboarding efficiency and achieving over 80% consistency.

INTEREST

- Interest: Hackathons, volunteering, basketball, traveling, soccer, running, reading about black history or science fiction.
